APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/084,106	02/27/2002	Robert Allan Unger	SNY-R-976	6776
24337	7590	05/01/2008		
MILLER PATENT SERVICES 2500 DOCKERY LANE RALEIGH, NC 27606			EXAMINER SHANG, ANNAN Q	
			ART UNIT 2623	PAPER NUMBER
			MAIL DATE 05/01/2008	DELIVERY MODE PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/084,106

**Applicant(s)**

UNGER, ROBERT ALLAN

**Examiner**

ANNAN Q. SHANG

**Art Unit**

2623

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 27 February 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-51 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-51 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SF/ICE)  
Paper No(s)/Mail Date See Continuation Sheet
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

Continuation of Attachment(s) 3). Information Disclosure Statement(s) (PTO/SB/08), Paper No(s)/Mail Date :4/29/02;5/7/02;10/3/02;4/7/03;5/23/03;1/30/04;8/17/04;11/3/04;3/15/05;6/2/05;7/29/05;10/28/05;1/27/06;4/25/06;7/24/06;10/30/06;2/12/07;6/29/07;9/4/07;1/14/08..

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1-51 are rejected under 35 U.S.C. 102(b) as being anticipated by **Blatter et al (5,838,873)**.

As to claim 1, **Blatter** discloses packetized data formats for digital data storage media and further discloses a method of providing multiple program identifier (PID) information for a multiple carriage content delivery system, comprising:

(Head end or Broadcaster) Constructing a program association table (PAT) that associates programs with primary PIDs; constructing a plurality of program map tables (PMT), one for each program in the PAT; constructing a lookup table that maps at least one primary PID to at least one shadow PID (col.2, lines 38-65, col.3, lines 46-49, col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+); and broadcasting the PAT, the PMTs and the lookup table over the content delivery medium (col.3, lines 46-49, col.4, line 35-col.5, line 54 and col.9, line 23-col.10, line 1+).

As to claim 2, **Blatter** further discloses where the lookup table is broadcast as one or more MPEG user private data packets (col.10, lines 25-33, col.11, lines 46-57, col.12, line 27-col.13, line 1+).

As to claim 3, Blatter further discloses where it is carried out at a cable television system (col.2, lines 38-65 and col.3, lines 46-49, col.4, line 35).

As to claim 4, **Blatter** further discloses a method of demultiplexing a data stream having multiple program identifiers for a program, comprising:

Receiving (fig.1) a program association table (PAT) that associates programs with primary PIDs; receiving a program map table (PMT); receiving a lookup table relating primary PIDs to shadow PIDs (col.3, lines 46-49, col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+);

Determining (Controller 115), from the PMT and the lookup table that a program is associated with both a primary PID and a shadow PID; and setting a PID filter to permit passage of packets having both primary and shadow PIDs (col.3, lines 46-49, col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+)

As to claim 5, Blatter further discloses further comprising establishing a demultiplexer output path for both the primary PID and the shadow PID (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+)

As to claim 6, Blatter further discloses where the lookup table contains a shadow PID for a shadow entitlement control message (ECM), and further comprising initializing a decrypter using the shadow ECM (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 7, Blatter further discloses where it is carried out in a television set-top box (fig.1).

As to claim 8, **Blatter** further discloses a method of constructing a stream of data

packets having primary and shadow packet identifiers (PIDs), the packets having headers and payloads, comprising:

A micro computer (Controller 'C' 115); a first primary packet buffer and a second primary packet buffer (Buffer 60);

A demultiplexer Receiving an incoming data stream having packets with the primary and shadow PIDs; providing a stream of packets having the primary PID to a first buffer (Buffer 60) col.3, lines 46-49, col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+);

Detecting (C-115) a packet having the shadow PID and a shadow payload in the incoming data stream; switching the stream of packets having the primary PID to a second buffer (Buffer 60) in response to the detecting; and searching (C-115) a last packet stored in the first buffer for a packet corresponding to the packet having the shadow PID (col.3, lines 46-49, col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 9, Blatter further discloses generating an interrupt as a result of detecting the packet having the shadow PID (col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 10, Blatter further discloses switching is carried out in response to the interrupt (col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 11, Blatter further discloses generating a packet having the primary PID and the shadow payload (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 12, Blatter further discloses generating comprises substituting the primary PID for the shadow PID into the packet having the shadow PID (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 13, Blatter further discloses the generating comprises substituting the shadow payload into the matching packet (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 14, Blatter further discloses where the corresponding packets have the matching sequence number (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 15, Blatter further discloses where the corresponding packets are encrypted under two different encryption techniques (col.4, line 35-col.5, line 54, col.8, line 16-53 and col.9, line 23-col.10, line 1+).

As to claim 16, the claimed "A storage medium storing instructions which, when executed on a programmed processor..." is met as previously discussed with respect to claim 8.

As to claim 17, the claimed "A method of constructing a stream of data packets having primary and shadow packet identifiers (PIDs), the packets having headers and payloads..." is composed of the same structural elements that were discussed with respect to the rejection of claim 8.

Claim 18 is met as previously discussed with respect to claim 9.

Claim 19 is met as previously discussed with respect to claim 10.

Claim 20 is met as previously discussed with respect to claim 11.

Claim 21 is met as previously discussed with respect to claim 12.

Claim 22 is met as previously discussed with respect to claim 13.

Claim 23 is met as previously discussed with respect to claim 14.

Claim 24 is met as previously discussed with respect to claim 15.

Claim 25 is met as previously discussed with respect to claim 16.

As to claim 26, the claimed "A method of constructing a stream of data packets having primary and shadow packet identifiers (PIDs), the packets having headers and payloads...." is composed of the same structural elements that were discussed with respect to the rejection of claim 8.

Claim 27 is met as previously discussed with respect to claim 9.

Claim 28 is met as previously discussed with respect to claim 10.

Claim 29 is met as previously discussed with respect to claim 11.

Claim 30 is met as previously discussed with respect to claim 12.

Claim 31 is met as previously discussed with respect to claim 13.

Claim 32 is met as previously discussed with respect to claim 14.

Claim 33 is met as previously discussed with respect to claim 15.

Claim 34 is met as previously discussed with respect to claim 16.

As to claim 35 "A method of constructing a stream of data packets having primary and shadow packet identifiers (PIDs), the packets having headers and payloads..." is composed of the same structural elements that were discussed with respect to the rejection of claim 8.

Claim 36 is met as previously discussed with respect to claim 9.

Claim 37 is met as previously discussed with respect to claim 10.

Claim 38 is met as previously discussed with respect to claim 11.

Claim 39 is met as previously discussed with respect to claim 12.

Claim 40 is met as previously discussed with respect to claim 13.

Claim 41 is met as previously discussed with respect to claim 14.

Claim 42 is met as previously discussed with respect to claim 15.

Claim 43 is met as previously discussed with respect to claim 16.

As to claim 44, the claimed "A digital receiver apparatus that reconstitutes/reconstructs a stream of data packets..." is composed of the same structural elements that were discussed with respect to the rejection of claim 8.

Claim 45 is met as previously discussed with respect to claim 11.

Claim 46 is met as previously discussed with respect to claim 12.

Claim 47 is met as previously discussed with respect to claim 13.

Claim 48 is met as previously discussed with respect to claim 14.

Claim 49 is met as previously discussed with respect to claim 15.

As to claim 50, Blatter further discloses where the program means comprises means for reading a DMA register (col.5, line 47-col.6, line 53).

Claim 51 is met as previously discussed with respect to claim 7.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

O'Callaghan et al (5,477,263) disclose method and apparatus for VOD with fast forward, reverse and channel pause.

Ando et al (6,453,116) disclose recording medium of stream data.

Leyendecker (7,079,752) discloses process for recording a scrambled MPEG stream.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **ANNAN Q. SHANG** whose telephone number is **(571)272-7355**. The examiner can normally be reached on **700am-400pm**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Christopher S. Kelley** can be reached on **571-272-7331**. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the **Electronic Business Center (EBC) at 866-217-9197 (toll-free)**. If you would like assistance from a **USPTO Customer Service Representative or access** to the automated information system, call **800-786-9199 (IN USA OR CANADA) or 571-272-1000**.
